[MM Docket No. 86-154; RM-4968, RM-5068 and RM-5360 et al.]

Radio Broadcasting Services; Conway, Hot Springs, Wrightsville, Fairfield Bay, Perryville, and Maumelle, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document grants a joint petition for reconsideration to the extent of deleting Channel 290C2 from Perryville, Arkansas, allotting Channel 290C1 to Hot Springs, Arkansas and allotting Channel 291C2 to Fairfield Bay, Arkansas. The earlier Report and Order had allotted Channel 290C2 to Perryville over the conflicting proposal to allot Channel 290C1 to Hot Springs. The Commission concurred with the petition for reconsideration that the earlier determination, which was based on a comparison of the respective populations which would receive service, was inaccurate. This document also modifies the license of Station KLAZ, Hot Springs to specify operation on Channel 290C1 and the license of Station KFFB, Fairfield Bay to specify operation on Channel 291C2. With this action, this proceeding is terminated.

EFFECTIVE DATE: July 1, 1988.

Radio Broadcasting Services; Scranton and Surfside Beach, SC

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, pursuant to the separate request of Broadcasting of Scranton and Scranton Communications, allots Channel 275A to Scranton, South Carolina, as the community's first local FM service. Channel 275A can be allotted to Scranton in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. The coordinates for this allotment are North Latitude 33-55-06 and West Longitude 79-44-36. The mutually exclusive request of Jones, Eastern of the Grand Strand, Inc. to substitute Channel 276C2 for Channel 276A at Surfside Beach, South Carolina, and modification of its

license for Station WYAK-FM to specify the higher powered channel, is denied. With this action, this proceeding is terminated.

[Docket No. 70639-8060]

Critical Habitat; Hawaiian Monk Seal; Endangered Species Act

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of final rule.

SUMMARY: NMFS is extending critical habitat for Hawaiian monk seals from 10 to 20 fathoms in all areas previously designated as critical. NMFS believes the designation of critical habitat to 20

fathoms will benefit the species because it includes additional areas that may require special management consideration or protection. Also, NMFS is adding Maro Reef to the areas designated as critical in the Northwestern Hawaiian Islands (NWHI).

DATE: This rule becomes effective on June 27, 1988.

ADDRESS: Dr. Nancy Foster, Director, Office of Protected Resources, NMFS, Washington, DC 20235.

FOR FURTHER INFORMATION CONTACT: James H. Lecky, NMFS, Southwest Region, Terminal Island, CA 90731, 213-548-2518; or Margaret Lorenz, Protected Species Management Division, NMFS, Washington, DC 20235, 202-673-5349.

SUPPLEMENTARY INFORMATION:

Background

After the final rule designating critical habitat out to 10 fathoms was issued (April 30, 1986, 51 FR 16047), NMFS continued to examine the basis for its decision. Of particular concern was whether areas beyond 10 fathoms were in need of special management consideration or protection either now or in the reasonably foreseeable future.

After inviting comments on whether the area between 10 to 20 fathoms around the islands may require special management consideration or protection and reviewing our earlier decision, NMFS proposed regulations that would extend the designation of critical habitat out to 20 fathoms in all areas currently designated as critical and would include Maro Reef (January 8, 1988).

All commenters on the proposed rule, except the State of Hawaii, favored extending critical habitat out to 20 fathoms and including Maro Reef in the areas designated as critical. The State believes there is insufficient evidence to show that waters from 10 to 20 fathoms deep, or around Maro Reef, are particularly critical, and they believe there is no legal basis for the proposed rulemaking. The State did not agree with the original designation of critical habitat in the NWHI. In this case, the State believes that, to date, there has been no convincing demonstration through the best available scientific evidence of a need for critical habitat designation. However, based on the best scientific data available, NMFS believes that there is sufficient justification to designate critical habitat out to 20 fathoms and to include Maro Reef in the designation. The components of monk seal habitat identified in the FEIS include foraging and breeding areas, pupping and major haul-out sites, and
